VOLUME XII. No. 43

EMPRESS, ALTA. THURSDAY, Mar. 19, 1925

Price: \$2.00 Per Year

## Anglican Church

The services at St. Mary's Church, next Sunday, March 22, will be conducted by the Rural Dean of the Diocese of Q'Appelle, Rev. G. N. Dobie, D.D.

## Good Price For Land

A price of \$53 an acre for a farm near Claresholm, Alberta was reported in a sale made during the past week. This is the highest price paid in that district for some years according to the Lethbridge Herald.

## IN MEMORIAM

In loving Memory of our Dear Wife and Mother, Sarah C. Staddon, who suddenly passed away, March 16th, 1918, seven years have passed since that day. When one we loved was called away, Never forgotten by Dad and Girls.

## IN LOVING MEMORY

of Richard Geeson (Dickie) the dearly loved son of William and Emma Wilkinson, who died March 21, 1922. "This lovely bud so young and fair, Called hence by early doom, Just came to show how sweet a flower, In paradise could bloom. Never forgotten by Dad, Mom and Sisters."

## Death of Mrs. Mary Hay

The death occurred on Sunday, March 15, of Mary Hay, mother of Alex. and Thomas Hay, of Empress. Deceased was a widow, and had been living in town with her son, Thomas, during this winter. She was 79 years of age, was born in Aberdeen, Scotland, and had spent 65 years of her life in this country.

Her remains were taken east, to Campbellford, Ont., Tuesday, Thomas Hay, being in charge of them until they are laid in their last resting place. The sympathy of the public is extended to the bereaved members of the family.

## Vicar of Wakefield

On Tuesday, March 17, a great number of people witnessed the dramatization of Goldsmith's immortal novel, "The Vicar of Wakefield," in seven reels of moving pictures, taking over two hours for presentation; being shown in the local theatre.

This picture has been placed on tour of the High Schools of the Province, by the Extension Department of the University of Alberta, and where arrangements can be made the public are given the opportunity of seeing this old classic.

Service of this kind by the Department is of great value from an educational standpoint as the films dealt with a subject set apart in the English literature of the higher grades.

## Public Shooting Areas

Public shooting areas have now been established in Alberta and other provinces by the Federal Govt. In Alberta there will be 32 of these areas, chiefly surrounding lakes, it is expected. The game commission of Alberta has not yet received official information as to the location of these areas.

## Summer Time

## Made Permanent

London, March 10.—The Government has adopted "summer time" as a permanent institution, making summer time permanent and fixing the yearly period from the beginning of April to the end of October.

## Total Wheat Yield

The total yield of wheat in Canada for the year 1924 is now finally estimated at 262,007,000 bushels from 32,055,710 acres, as compared with 474,199,000 bushels from 22,671,864 acres in 1923.

## Seed Grain Relief

The matter of securing seed grain relief is at present the chief concern among some farmers of this district and other portions of the province. On the Saskatchewan side of the boundary near the main line of the railway towards Medicine Hat, where apparently the crop failure was greater, the Sask. Prov. Govt. is assisting with relief as follows:

Bitter Lake Municipality, No. 112, has \$15,000 for seed grain relief, Enterprise Municipality, No. 172 has \$20,000 for relief, and Deer Forks No. 232 has \$30,000. In the local improvement districts, agents have been placed with instructions to furnish necessary relief.

In view of the above, just what action the Alberta Prov. Govt. intend to take in this regard should be made publicly clear immediately—whether or not the farmer may expect any relief. A little serious thought on the matter may show that it is an unwise policy to turn these farmers down absolutely.

Over the entrance to the Greek temple was written, "Know Thyself," and it is always over every other door that opens from ignorance to wisdom. "Know Thyself," know who and what you are, where you came from, what you are doing, and where you are going—Fill more.

## Passenger Man Appointed to Railway Executive

W. B. HOWARD

W. B. Howard, whose appointment as General Executive Assistant was announced by E. W. Besty, chairman and President of the Canadian Pacific Railway. Mr. Howard, who has been Assistant General Passenger Agent, succeeds F. L. Woadley, whose retirement was announced at the end of the year. Mr. Howard is one of the youngest of the company's officials although he entered its service twenty-five years ago. Born in Chatham, N.B., he joined the Canadian Pacific forces as junior clerk at St. John, N.B., in 1897, and two years later was promoted to the position of travelling passenger agent. Since that time his promotion has been rapid and he is well known throughout the west as a very competent officer. On two occasions Mr. Howard has been in charge of the train placed at the service of the Prince of Wales by the Canadian Pacific.

## OVERWORK

Those of us who make it our business to consider the problems of ill health are careful to study every problem that might contribute to such a condition. While very little attention has been given to overwork in veterinary literature, it is but fair to give the animal the same serious consideration on this point that our physicians give their human patients.

Need of rest and recuperation in the human family is fully admitted. This is recognized in the period of vacation that every person expects to take some time during the year. It is recognized in the fact that we work or are supposed to work, only six of the seven days of the week, and often factory workers and others are given Saturday afternoons, which leaves only five and a half days' work out of seven.

In fact, when the number of working days in the year are summed up, it is very likely that the average individual works less than 75 p.c. of the time. Yet, in spite of this, it is common knowledge that many of our citizens who seek medical advice are urged to take a much-needed rest and refrain from their active duties for a number of weeks or even months, in order that their depleted bodies may be built up and their mental fatigue overcome.

We hear a good deal about the busy business man who goes to his office at 9 o'clock in the morning and leaves again at four or five in the afternoon, or the overworked farmer who gets up at four o'clock in the morning during the harvest time and works until eight or nine o'clock at night for a few months of the year. But you can visualize the same individual during the winter time—often hibernating and not taking life easy. So that over a period of years most people are not considerably overworked.

Probably the person who does more actual time work without relief is the housewife who has the responsibility of her duties for many hours of the day and every day in the year. You will probably agree that she suffers more often from fatigue and overwork than any other one of the doctor's patients. When with that is coupled the exhausting or tiring of child-bearing and nursing, you have a combination of circumstances that has a decided tendency to overwork the frail human body.

## OVERWORKED ANIMALS

If these things are true in the human family, we have a parallel situation in animals, and we can analyze the situation and see why our present stock are not as robust as their ancestors on the open range. We have about concluded that we

## Million Bushel Shipping Points

Four points on the Lethbridge division of the C.P.R. shipped more than a million bushels of grain each in the shipping season of 1924-25. These points were Vulcan with 1,135,000 bushels, High River with 1,032,000 bushels, Nanton with 1,020,000 bushels, and Cardston with 1,020,800 bushels. The total shipments of the division to March 1, were 22,508,000 bushels of which 19,759,000 bushels was wheat.

Another excellent labor-saving device for polishing floors is an infant that can crawl.

know what the proper amount of work is for a horse. If he works eight hours a day it is concluded that he has done enough for the 24-hour period. In experience of the season he may work a longer time, but we know that it is foolish to attempt to work him 15 or 16 hours, because physically he is unable to keep it up, and it would be an unwise policy.

Certain of our domestic animals are not called upon for any physical work, such as the sheep and goats. These animals of course, do not properly come within the scope of this discussion. There is an old joke about the hen laying so many eggs that she exhausted her body, and the joker maintains that it is quite humorous to suspect that there is a certain "wear and tear" on the hen. But when you consider that this fowl laid originally only 15 eggs, or just enough to fill her nest and raise a small brood to propagate the species, and now certain individuals are giving over 320 eggs a year, it is idle jest and no humorous joke when you say that the wear and the tear on the physical body of the fowl is a reality and not a myth. These animals without question, are overworked and it is a well known fact that hens in the later end of the egg-production period are not fertile from these high-producing individuals.

—Dr. E. E. Wegner, State College, Wash.

## UNION CHURCH

Sunday School, 2 p.m.  
Public Worship, 7.30 p.m.  
Sermon topic: "What we learn from the Divinity of Christ."

Watch Repairer & Music Dealer  
1st Door West, Post Office

SWP means Sherwin-Williams Paint (Prepared). This is the best paint for you to use because it is made of pure materials—pure lead, pure zinc, pure Linseed Oil, and pure coloring pigments which are thoroughly mixed and ground in scientific proportions by powerful machinery.

It is better than the old fashioned hand-mixed paint because the materials are put together according to correct chemical formulae which have been tested out in a practical way. Its fine grinding makes it cover nearly 50% more surface than hand-mixed paint.

SWP is an economical paint because it will cover the greatest amount of surface, wear longest, and look best.—Ask us for color cards.

## Communist Activities In France Have Been Cause Of Uneasiness

Rome—Laying a new emphasis on the power of the Geneva peace protocol to ally the anxieties of mankind, the thirty-second session of the Council of the League of Nations adjourned with its members expressing determination to pursue the study of the protocol at the March meeting and to inaugurate arrangements for an international conference on the reduction of armaments.

France has given notice, through former Premier Briand, that she is ready to base her world policies on the protocol and henceforth submit all her disputes for arbitration. She said she was ready to even examine amendments to the protocol in a friendly spirit.

The members of the council separated this evening without taking any action on the Anglo-Egyptian dispute, and it was learned that one consideration entering into this decision, although indirectly, was the sentiment that the time had arrived in Europe when violence must be checked in the interests of all and Bolshevism prevented to increase its inroads on the international situation.

Recent activities of the Communists in France have caused a certain amount of uneasiness and have been privately discussed by several members of the council. Information obtainable in Rome shows that Premier Maginot's determined stand against Communism in Italy has resulted in a considerable number of the followers of the red flag taking refuge in France.

## Did Not Influence Shareholders

**Exonerated of Field Service Officers of Elevator Company**

Régina—That there is no evidence in the files of the Saskatchewan Elevator Company, of any attempt to influence shareholders as to the appointment of directors, the company's shareholders were told at the annual meeting here.

This was the report of F. G. Smith, chairman of the committee appointed to investigate charges that the men of the field service department had been instructed to use their influence to keep the directorate composed of men who would not let the company become involved in the political arena. There is evidence, the report continues, "that after the appointment delegates were approached to assure their support to the company."

The report concludes that there is ample evidence of cooperation with the wheat pool.

## Anti-Oriental Bill

**Would Bar Orientals From Work With Whites In B.C.**

Victoria, B.C.—Noting a new bill to prevent the employment of Oriental and white girls together in the homes of this province was given by Mrs. Mary Ellen Smith, Liberal, Vancouver. Mrs. Smith's motion, which she successfully piloted through the house last year and which prevents employment of Oriental and white women together in restaurants, "social societies" representatives have been here for several days pressing for the passage of the new anti-Oriental law.

**Milneford Favors Entente**

Brussels—Former President Milneford of France, in the course of a lecture here, declared that a close entente of Great Britain, Belgium and France was necessary to preserve the peace of Europe at present and that he showed she was impatient.

## Hope Is Expressed For Early Settlement Of Irish Boundary Question

Belfast—References to the Irish boundary question feature the Christiana messages from prominent persons being printed by a newspaper of Newry, on the Armagh-Dublin boundary.

William T. Cosgrave, president of the Free State Cabinet, in his message says: "It is a great gain for peace and harmony that the question be no longer one of acute political controversy, but of practical examination by a body legally entitled to deal with it."

Archbishop O'Donnell, who was coadjutor to the late Cardinal Logue, says: "It will be a happy day for us all when the north and south agree to obliterate the boundary." The competition is open to every Canadian.

## Plans To Consult Dominions

**British Parliament Considering Change On Matters of Foreign Policy**

London—In the House of Commons Premier Stanley Baldwin stated that the government was communicating with the governments of the dominions, and he hoped to make a statement shortly regarding the proposals for a preliminary enquiry into a system of consultation on matters of foreign policy as outlined by former Colonial Secretary Thomas on July 20.

## Authors' Competition

Quebec—Five hundred dollars to the author of each of 12 stories in Canadian history will be paid by the Quebec Government, according to an announcement made by the provincial secretary's department. The competition is open to every Canadian.

## Report Black Wolves In Ontario

Park Arthur, Ont.—The Outlook township correspondent of the News-Chronicle writes that several black wolves have been seen there the past few days. They are much bigger than the ordinary timber wolf and the belief is expressed that they are black Siberian wolves, which, unlike the Canadian species, are ferocious at all times and will attack without warning.

## New German Ambassador To U.S.

Berlin—Baron Ago von Maltzen is reported to have been declared acceptable by the Washington Government as German ambassador to the United States to succeed Dr. Otto Weddick.

## Western Editors

### May Form A Coarse Grain Pool In Manitoba

Winnipeg—Preparations for the formation of a coarse grain pool, similar to the Manitoba wheat pool, will be discussed at a meeting of directors and members of the provincial organization tomorrow. The board of directors of the Manitoba pool adopted the following resolution: "The board of directors hereby declares itself in favor of the principle of a coarse grain pool to provide for the co-operative marketing of oats, barley, rye and flax, and records its belief that steps should be taken to put it into effect with a view to commencing by the 1925 crop."

Granville H. Puckett, Editor and Manager of The Winnipeg Times, Winnipeg, Sask.

## Opening Of Parliament

**Forthcoming Session May Not Start Until February**

Ottawa—January 22, as the approximate date for the opening of parliament, now appears to be too early an estimate. January 29, or even the first week in February, appears to be more likely as the time for the opening ceremonies. The later dates are more probable in view of the fact that the cabinet has not yet commenced the estimates for 1925. Last year parliament met on February 23, and in the previous year at the end of January.

Premier King has indicated that it will likely be early February before parliament gets down to work. In this case the official opening would take place on Thursday, January 29, followed by the customary weekend adjournment until Monday, February 1, when the debate on the speech from the throne would commence. The summing up of parliament is always the last day in the Canada Gazette one month before the actual date.

## Optimistic For Future Of Sheep Industry

**Livestock Commissioner Emphasizes Present Time Value To Farmer**

Windsor—With the high prices obtainable for wool and mutton at the present time, the sheep industry continues to be optimistic for the future of the agriculturalist who includes a flock of sheep among his livestock, and in an interview here stresses the importance of more farmers, especially in the west, taking up this branch of the industry.

## Egyptians Are Warned

**Measures Taken To Prevent Nationalist Propaganda On Part Of Students**

Cairo—The ministry of education has issued a notice warning parents that they will be held responsible for the conduct of their children, and stating that students will be dismissed from the schools if they absent themselves without leave or legitimate reasons, according to the notice. Meetings in the schools are forbidden and students are not permitted to publish in the press any notifications of meetings. Head masters are ordered to take vigorous action in cases where students infringe instructions.

## May Sell Lignite Plant

**Negotiations For Disposal Of Plant In Under Way**

Régina—Announcement of the disposal of the lignite briquetting plant at Benteau may come before the end of the present session of the Saskatchewan legislature, Minister in charge of the bureau of labor and industries, told the Saskatchewan Legislature.

Mr. Gardiner indicated negotiations for the disposal of the plant to a private company had reached the stage of a preliminary agreement had been forwarded to the Dominion and Manitoba Governments. He was hopeful it would be satisfactory to all parties concerned.

## Unnecessary Scrapping Of Ships

New York—William B. Shearer, naval expert and inventor of torpedo and amphibious tanks, said before the board of directors of the Naval Officers' League, at the Bankers' Club, that the United States "sentimental hysteria" for scrapping naval armaments had left her at the tail end of a 5-3-1 ratio, instead of on a par with Great Britain, according to the 5-5-5 treaty.

## Crow's Nest Rates To Be Dealt With By The Government

Ottawa—The Crow's Nest rates case recently agreed upon by the cabinet, will be dealt with this week. The outcome is somewhat speculative, although there is little doubt that the government will propose legislation in the coming session to lay down the broad principles of a re-adjustment of freight rates on national lines. The railway commission would be the tribunal which would work out the details of the rate schedules.

## B.C. Liquor Ruling

**No Compulsory Jail Sentence For First Offender For Selling Liquor**

Victoria, B.C.—In future there will be no compulsory jail sentences for offenders in the sale of liquor in British Columbia, but fines from \$500 to \$1,000 will be imposed, with the alternative of a prison sentence of from six to 12 months, according to amendments to the Liquor Act introduced in the legislature by Attorney-General Macdonald. For second offences there will be prison terms of from 12 to 21 months.

Motors' pensions hereafter will be paid out of liquor profits. Distribution of profits to municipalities which receive 35 per cent, with 15 per cent to the province, in future will be based on school population, and not on the census.

## Germany Building Cruiser

**First Ship of New Fleet Kiehl Completion At Kiel**

Kiel, Germany—The first German man-of-war constructed since the Great War is nearing completion here. It is a small cruiser of 6,000 tons, and is to be named the *Yorck*. For the present it is unnamed, being designated by the letter "A." The cruiser will have a speed of 29 knots, will be armed with 15-centimetre guns, all placed amidships and will use both oil and coal for fuel. The *Yorck* was built under the German navy's limited to six ships of the line, six small cruisers, twelve destroyers, and twelve torpedo boats. The cruisers new in service all date to 1900 and are admittedly obsolete.

## Canada Will Benefit By Overseas Act

**Better Class Of Citizens Expected Under New Settlement**

Toronto—Speaking here regarding the new bill to amend the British Overseas Settlement Act, W. C. Nason, Ontario general in London, said that under its provisions a good class of citizens would come to Canada. "It is equally certain that the worst would be excluded," he said, and "there is a natural disinclination to leave home and country," he said, and "people who can make both ends meet are not likely to come."

The speaker declared that the United States quota regulations would operate to the benefit of Canada.

## Invited Prince To Visit South America

**President Extended Invitation While In London In 1922**

Buenos Aires—The Prince of Wales' proposed visit here next year, it is stated in official quarters, is in response to an invitation extended by President De Alvear, while he was in London, in 1922, before his inauguration. It is related also that the visit will coincide with the celebration of the centennial of the first treaty of amity and commerce concluded between the countries.

The official programme of entertainment for the Prince has not been completed, but it is understood that it will include visits to some of the principal ranches and polo pony breeding establishments in the country. The possibility is indicated that the Prince of Wales may also visit other South American countries, such as Uruguay and Chile.

## Wins Peace Prize

Who is the winner of the first award made under the Woodrow Wilson foundation of \$25,000 for the advancement of peace?

## Waitresses Out Of Work

**Closing Of Wembley Exhibition Solves Problem Of Overpaid Waitresses**

London—When the British Empire Exhibition at Wembley closed its gates recently, it was stated that 17,463.19 persons had visited this Empire in miniature since its opening last May.

Thousands, at last temporarily relieved the domestic servant problem of London by throwing out their wages recently. It was stated that 17,463.19 persons had visited this Empire in miniature since its opening last May.

## Germany Building Cruiser

**First Ship of New Fleet Kiehl Completion At Kiel**

Kiel, Germany—The first German man-of-war constructed since the Great War is nearing completion here. It is a small cruiser of 6,000 tons, and is to be named the *Yorck*. For the present it is unnamed, being designated by the letter "A." The cruiser will have a speed of 29 knots, will be armed with 15-centimetre guns, all placed amidships and will use both oil and coal for fuel. The *Yorck* was built under the German navy's limited to six ships of the line, six small cruisers, twelve destroyers, and twelve torpedo boats. The cruisers new in service all date to 1900 and are admittedly obsolete.

## Wants Peace Prize

Who is the winner of the first award made under the Woodrow Wilson foundation of \$25,000 for the advancement of peace?

## Girls Will Go On Long Hike

**Dog Team Trip To Hudson Bay In Search Of Health**

The "Pat"—The bracing air of Northern Manitoba will be tried out by health restorers by a party of young women from Auburn, N.Y., who will arrive here on December 29 to head a dog team tour of the northern wilds along the shores of Hudson Bay.

In search of health and physical development, Miss Florence McIntosh and two girl friends have arranged for three picked dog teams, together with competent guides, to take them on the lengthy tour.

The time of year chosen for the outing is the extreme cold of the northern season, and it is claimed by physicians that such a sudden shock to the unaccustomed physical system will produce the desired restorative results.

Some of the best cared for and fastest running dogs of The Pat Dog Breed will be at the disposal of Miss McIntosh and her young friends in this novel and healthful undertaking.

## Must Pay War Debts

**Creditors In Europe Must Pay Britain**

London—Winston Churchill, chancellor of the exchequer, alluding in the House of Commons to the Franco-American war debt conversations, said the government would consider it essential that any payments made by the United States to France to their creditors in the United States, should be accompanied simultaneously by proportionate payments to Great Britain.

## Want Veterans Brought Back

**Government Will Be Asked To Re-establish Those Resident In U.S.**

Toronto—Emigration of war veterans from Canada will be made the subject of a debate in the House of Commons next session by T. L. Church. The member for North Toronto has given notice of his intention to move that the government should take immediate steps to repatriate and re-establish in civil life those members of the Canadian expatriate force now resident in the United States.

## Egyptian Situation Clearing

**No Need For Pessimism Now Declared Premier**

Cairo—"The situation does not warrant pessimism," Premier Zaglul Pasha is quoted as declaring in an interview granted to Italian newspapermen. Negotiations, he said, were proceeding between the British and Egyptian Governments on the question of protection for foreign interests, and he hoped that matters would take a normal course in the near future.

The premier declared there were good intentions of the British Government's good intentions and the fact that King Fuad had nominated Sir Geoffrey Archer as governor-general of the Sudan showed that the Anglo-Egyptian agreement in that territory was being respected.

## Approve Naval Bill

Washington—The United States approved the naval construction bill authorizing a programme expected to cost \$110,000,000.

## Allied Mission Finds That Versailles Treaty Provisions Are Ignored

Paris—The protest of commission between Germany and the allies, particularly with France, has received a setback, it is feared in French circles, by the report of the inter-allied military control mission in Germany to the effect that the provisions of the Versailles treaty concerning disarmament are not being carried out.

The allied mission, according to its report, has found that the German general staff continues its deliberations, as it did before the war, that the German armaments factories are turning out new war material, and that Germany is in the process of forming an effective force of soldiers far surpassing the limit fixed by the Versailles pact.

## First "Beam" Station

London—The site of the first beam station in the British Empire has been chosen. It is near Dorchester, Dorsetshire county.

## League Of Nations

The mission complains of innumerable hindrances put in its way of its work. These hindrances, it was stated, did not, however, prevent it from discovering (inter alia) instances for the prohibition of arms and munitions and the finding of secret stocks of newly-manufactured rifles and cannons.

This report, it is understood, will put the council of ambassadors in the dilemma of renouncing the conditions it imposed on Germany to transfer its mission of control from a military to a civilian body, or of opposing the policy of the present French Government which favors immediate transfer of the military control of Germany to the League of Nations.

**Children Patronize Pairs**  
Children create 60 per cent of the business of all state fairs, declared A. R. Money, St. Paul, Minn., speaking at the convention of the National Association of Fairs and Expositions at Chicago. "They bring their parents and stay the longest and spend most money on the concessions," he said.

part of the province, with unlimited possibilities, now we find that the freight rates interfere, and the end will likely come before the beginning. So there you are.—Calgary Albertan.

---

Everbroke.—"Yes, sir, the doctors gave me up a year ago."

Espunge.—"So did all your other creditors."

The tiniest industry is the making of stains which pick out certain bacilli in human tissue when inspected through a microscope. A ton of these dyes would meet the demand for about a century.

In Japan, where there is less than 2 per cent illiteracy, all the children go to school.

deluged police stations with complaints.

being inserted in the reign of Edward I.

Lack of an adequate aircraft indus-  
try is a matter of grave concern to the  
United States Government, in the  
judgment of the National Advisory  
Committee for Aeronautics, as pre-  
sented in its annual report to Congress  
by President Coolidge.

Reports from the present German  
German commercial activities portend  
an attempt to form a vast Euro-  
pean steel trust, including France,  
Germany, Great Britain, Belgium,  
Luxembourg and possibly Poland and  
Czechoslovakia.

## Will Await Federal Action

Alberta Farm Loan Act is Stopped  
Pending Move at Ottawa

The Alberta Farm Loan Act will  
continue inoperative, pending the ac-  
tion of the Dominion Government in  
regard to a "general rural credit  
scheme for the whole of Canada. This,  
as stated by Hon. R. G. Reid, pro-  
vincial treasurer, in view of the dis-  
cussion of rural credit at the recent  
tax conference in Ottawa. A federal  
act is likely to be introduced in the  
Dominion Parliament at the coming  
session.

In Korea, Japanese are tightly es-  
corted even within the family circle.  
Before the Japanese came, and the  
new era began a "fady" of rank in  
Korea was more carefully guarded  
than even at Mohammedan homes of  
similar social position.

## Fears Revolt of Red Army

Soviets Now Trying to Force Asien-  
sians From French Government

The immediate fear of the Soviet  
leaders is that the Red army will re-  
volt if not paid and fed. The last  
three days they were about to begin  
food for the 10,000,000 to 20,000,000 in  
the Volga and Caucasus now facing  
famine.

An attempt to force Great Britain  
into giving Russia a loan by intensify-  
ing the revolutionary propaganda in  
France and Egypt and Mesopotamia  
was thwarted by the English elec-  
tions. The Soviet relations with Italy  
are a farce. The only other country  
rich enough to give the Soviets credits  
is France.

From the Constantinople aspect, the  
communist Internationale sent Vic-  
timir Kolomoisetz, skilled propaganda  
director, and 100 ordinary officers to  
France and the French colonies. The  
"offensive" against the French Gov-  
ernment is the last end in the  
Soviet hands, and if it fails Russia  
may fall into chaos before midnight.

MOST OLD FOLKS  
REQUIRE A  
HEART AND NERVE TONIC

After middle age little sickness and  
ailments seem harder to shake off than  
quicker at the heart action becomes  
weak and uncertain and the nerves  
are not so steady as they were in the  
younger days.

At the time when all aged people  
wish to maintain their health and  
vigor and retain their energy un-  
impaired should use

MILBURN'S  
HEART AND NERVE PILLS

Mrs. M. O'Connor, Whitehouse, Ont.,  
writes: "I have been troubled, most  
of my life, with shortness of breath,  
palpitation of the heart, and fainting  
spells. I was advised by a friend to  
use Milburn's Heart and Nerve Pills,  
and at once found relief, and I  
have never had a really bad spell  
since. I am a 80 years of age and I  
have kept them in the bottle, and I  
feel that with their help I will many  
years yet. I always recommend  
them to anyone who is suffering from  
heart trouble."

For sale at all druggists and dealers.

## Branch Line Motion Endorsed

Unanimous Assent Is Given in Sas-  
katchewan Legislature

Unanimous assent was given in the  
Saskatchewan Legislature to the  
branch line resolution proposed by A.  
J. Hindle, Government, Whitehouse.  
The resolution, adopted without  
amendment, reads as follows:

1. That the three-year programme  
should be adhered to in introducing  
legislation into the House of Com-  
mons to provide for the construction  
of further branch lines of the Cana-  
dian National Railway.

2. That the bills affecting Sas-  
katchewan which were defeated by the  
senate last session should again be  
introduced in the next session.

3. That the action of the senate in  
rejecting such bills last session did  
not constitute a valid reason for the  
modification of the veto power of that  
body.

The Last Assault Attack may really  
be the last one if prompt measures are  
taken. Dr. J. D. Kellogg's Asthma  
Cure has been found to be the most  
penetrating to the smallest bronchial  
passage and bring about healthy con-  
dition. It always relieves and  
restores.

Why not get this long-famous  
remedy today and commence its use?  
It is the most famous remedy in the  
world.

## Arrival Of Bachelor Boat

Comprised 50 Per Cent. of First-class  
Passengers on Empress of Russia

Bride ships have been common on  
both the Atlantic and Pacific, but set-  
tlement of a bachelor boat came to port.  
This distinction was accorded the  
Empress of Russia when she crossed  
the Pacific this trip, as in her first  
voyage she had more than 50 per  
cent. of names were those of eligible  
bachelors, from a handsome Dutch  
man who was but 31; inches to a  
dapper little Italian.

Constantinople Invaded My Mice  
The backing of the Turkish Gov-  
ernment are being held up by an army  
of mice that is infesting the government  
buildings. Instructive legislative  
measures are being laid aside while  
ways and means are devised to get rid  
of the rodents. Other parts of Con-  
stantinople also are suffering from an  
invasion of mice.

## Antelope Increasing

Within the radius of 10 miles of  
Taber, Alta., it is estimated that 1,000  
antelopes are now collected and they  
are expected to be eating the farmers'  
green feed, reserved for their cattle.  
The antelope was never exported at  
one time, but under protective mea-  
sures is coming back. Antelopes are  
also to be found in the Brooks district.

Mexico climbed the world's largest  
tree, a huge cypress at Tula, in the  
state of Oaxaca. This tree grows  
124 feet in circumference. The Cali-  
fornia big trees grow higher, however.

Minard's Liniment Used by Physicians

## Romance Of World War

German Flier Marries Sister Of War-  
time Hero

Two air pilots, a German and an  
American, fought a thrilling duel in  
the air over Dijon, France, during the  
World War. The German was cap-  
tured after being wounded by bullets  
from the American's plane.

The German, Baron Hans von Rieg-  
hausen, came to Omaha to marry Mrs.  
Bertha M. Wendell, sister of the  
American, Charles E. Cummings, for-  
mer pilot of the Ford Legion.  
Mrs. Wendell nursed the Baron back  
to health while she was a Red Cross  
nurse in the Angouleme prison  
camp. The Baron and his bride will  
make their home in Omaha, he  
having disposed of his holdings in  
Germany.

## Motorists Should Be Efficient

Require As Severe a Test As Railroad  
Engineers

A locomotive engineer must serve a  
long apprenticeship before he is en-  
trusted with the running of an engine;  
and unless his eyesight is good enough  
to stand stove tests he cannot hold a  
job as engineer. If such care is neces-  
sary in the case of a man who runs  
a locomotive on a track, should not  
equally care be taken to ensure that  
the driver of a motor car is equally  
careful in the case of a man or woman  
who undertakes to drive a motor car  
along crowded thoroughfares where it is  
necessary to steer as well as to regu-  
late speed?—Hamilton Herald.

## Long Distance Record

Signals From San Francisco Station  
Reid 15 Degrees From South  
Pole

The Norwegian ship, Sir James  
Clark Ross, 15 degrees from the South  
Pole, reported by radio and cable that  
signals from KFS, Federal Telegraph  
Company station at San Francisco,  
were strongly heard and requested the  
station there to listen for a report  
from the ship. This is one of the  
world's greatest long distance radio  
records, official of the company state  
that strong efforts will be put forth  
to establish direct two-way communi-  
cation.

Sores Heal Quickly.—Have you a  
persistent sore that refuses to heal?  
Try Dr. Thomas' Eczema Ointment in  
the dressing. It will stop itching,  
carry away the proud flesh, draw out  
the pus and prepare a clean way for  
the new skin. It is a recognized heal-  
ing among all and has been used for  
centuries that it healed where properly  
applied.

## Price Will Visit Argentina

Expected to Go After Trip to Africa  
in Spring

The Prince of Wales' visit to Ar-  
gentina is expected to occur after his  
trip to South and West Africa in the  
spring. It is stated in well-informed  
quarters.

The announcement that the Prince  
will visit Argentina created some dis-  
satisfaction in Great Britain. The  
British Empire State is a country  
not surprising if opportunity were  
taken to make the visit the occasion  
of elevating the British legation at  
Buenos Aires to the rank of an em-  
bassy.

## Britain Hoping France Will Pay

Negotiations With United States  
Has Aroused Interest in Financial

The report that France has begun  
negotiations for funding her debt to  
the United States has aroused consid-  
erable stir in financial and political  
quarters in London, and is attracting  
notice in the press.

Most of the comments thus far re-  
veal an expectation that, if France ar-  
ranged to pay the United States she  
will also arrange to pay Great Britain.

He: "Darling, I have a question I've  
wanted to ask you for weeks." She:  
"Go ahead, I'm in an answer mood  
for months."

ITCHY ECZEMA  
ON ARMS

In Pimples. Could Not  
Sleep. Cuticura Heals.

"My trouble began with eczema  
which broke out in pimples and  
spread rapidly. It affected my arms  
from the elbows to the tips of my  
fingers. I could not put my hands  
in water they itched and burned so,  
and I could not get my regular  
work. I could not sleep on account  
of the irritation."

The doctor advised me to use  
Cuticura Soap and Ointment and in  
less than a week my arms were  
after using one and a half cakes of  
Cuticura and the box of Ointment.  
(Signed) Mrs. S. L. M. May,  
Marquette, Wis., June 6, 1923.

Cuticura Soap, Ointment and  
Talcum powder promote and maintain  
purity, softness and skin. It keeps  
you clean when all else fails.

For further information, write to  
Cuticura, Dept. 10, P. O. Box 10,  
Springfield, Mass. 01102. Cuticura  
Talcum powder and Soap are sold  
everywhere.

## Trade With the Motherland

Imperial Preference As It May Be  
Applied to Canada

If effect is given the Imperial Econ-  
omic Conference resolutions as they  
were adopted, Canada will chiefly  
benefit on her exports of canned sal-  
mon and canned lobster, raw apples,  
honey, dried fruits, sugar, tobacco and  
to a certain extent peaches, on native  
wine.

Under the resolutions, Empire-dried  
fruit is to enter the British market  
free, while foreign-dried fruit will be  
dutiable at ten shillings and sixpence  
per hundredweight. This applies to  
such foreign-dried fruit, namely, ap-  
ples, pears and peaches, as the Do-  
minion may "consider of interest to  
their trade. On sugar the British  
Government guaranteed that if the  
duty were reduced the preference, for  
a period of 10 years, would not fall with  
it.

On tobacco the preference is to be  
increased from one-sixth to one-quar-  
ter.

On wines of a strength between 30  
degrees and 40 degrees, preference to be  
doubled.

On shelling walrus, preference to be  
increased from 30 per cent. to 50 per  
cent.

Raw apples from the Dominions to be  
admitted free; foreign raw apples to  
be taxed five shillings per hundred-  
weight.

Canned salmon, canned lobster,  
crayfish, crabs and honey to be duty-  
able ten shillings per hundredweight  
when from foreign countries; free  
when from within the Empire.

## British Obligations

War Debt to U.S. Was Worry Until  
Payments Arranged

France is not worried at all about  
the slow payment of the French war  
debt to the United States.  
Nor is France worried about the  
depreciation in the value of the  
franc outside the French Republic.  
Britain never ceased to worry over  
British obligations on account of war  
borrowings from the United States  
until these obligations were put in the  
way of being repaid.

Britain never ceased to labor for the  
restoration of the pound sterling to its  
peace time rate of exchange.

Today the pound sterling is quoted  
at \$45.25 in New York.

Britain has obligated her people to  
pay a yearly sum equal to the entire  
annual value of Britain's coal output.  
That sum equals less than \$50,000 per  
day for the next sixty years.—Toronto  
Telegram

## Predicts Another World War

French Astronomer Repeats Warning  
He Issued in 1914

The Abbe Moreux, a noted astro-  
nomer, and the director of the Bourges  
Observatory, has created a sensation  
in Paris by stating that the year 1923  
may see another great war, or at least  
a critical period in the world's history.  
He is basing his prediction on the  
sunspots after the manner of the  
sunspots after the manner of the  
nations, and even individuals, is re-  
sponsible for this warning.

In 1910 the Abbe Moreux stated that he  
warned the governments of Europe of  
the impending disaster of 1914-1918.  
That sun reached its peak in 1923.  
The sunspot cycle is 11 years, and  
warned again to our governments the  
warning I gave in Brussels in 1910."

A safe and sure medicine for a child  
troubled with worms is Mother Gray's  
Worm Expeller.

## Devise Eliminates Noise

Invention Permits Much Quieter  
Operation of Airplanes

The problem of eliminating the ex-  
cessive noise of the airplane during  
flight has been practically solved as  
the result of experiments which have  
been in progress for some time, ac-  
cording to the Daily Express. It was  
found that the noise was caused by a  
new device, the paper says, has been  
invented which permits the noiseless  
operation of exhaust gases from an en-  
gine without interfering with the speed  
or lifting power of the plane, while a  
propeller that operates without the  
load which has been devised by an in-  
genious arrangement of gears attached  
to the engine.

At the same time, by increased use  
of internal bracing, much of the noise  
caused by the rubbing wind  
through wires and spars is avoided.

## Western Horses Win At Ottawa

For the first time in the history of  
the Ottawa horse show and winter  
fair, western entries were received.  
Lavelle and Davidson, of Watrous,  
Sask., won the blue ribbon for the best  
six-months team in the show.

## Cure For The Blind

Veterans blinded in the war may  
have their sight restored if the optic  
nerve is intact, according to Dr. Don-  
aldson, of Boston, France, who pur-  
sues his researches on the optic nerve  
to have restored at least partial sight  
to 14 out of 230 men who he treated.

## Grain Prices

At Empress, Thursday,

Wheat No 1, Nor.	Track Wheat
Flax	Oats
Barley	Rye

Spring commences tomorrow Friday March 20.

Born—To Mr. and Mrs. Balowicz, March 18, a son.

Mr. and Mrs. Mansell Leash, left town this week to take up residence on their farm at Mayfield.

C. W. Dawdy, returned from Winnipeg, on Wednesday.

Grant McDonald, who has been putting in the winter months at Wilson's ranch, returned to town this week.

A tornado that left a wake of maimed and dying in its path ranged through E. Missouri, Indiana and Illinois, to day. Several towns and cities were visited by the tornado. The dead are said to number 966 while the wounded are placed at 2,674 according to early reports.

J. Cusack, returned to town, Monday.

Ab Russell, and confere's have moved out to the farm.

News is reported of the death of Jim Wade, a former butcher of this town, at Lethbridge, two weeks ago.

A number of farmers of the Bonstall country, who left for Edmonton last fall, are reported as returning to that district.

Mrs. C. Wolfer, of Bonstall, was admitted to the hospital on March 16.

"One hears a great deal about the absent-minded professor, but it would be hard to find one more absent-minded than the dentist who said soothingly, as he applied the tool to his automobile, under which he lay. 'Now, this is going to hurt just a little'."

## THE EMPRESS EXPRESS

Subscription price \$2.00 per year to any part of Canada or Great Britain  
\$2.50 to the United States

R. S. Sexton Proprietors A. Haskin

Thursday, Mar. 19, 1925

Born—To Mr. and Mrs. A. W. Wilson, Albee, March 14, a son.

E. Staddon, of Josephine, was an inmate of the local hospital, March 17 and 18.

Mrs. John Neibauer, of Bonstall, was admitted to the hospital, March 17.

E. L. Kenney, was the winner of the Singles Curling Competition.

A. L. Lusley returned this week from Virden, Manitoba, to look after his farm interests.

The Curlers are holding their annual meeting and banquet at the Dominion Cafe.

Mr. Killek, manager of the local Creamery is visiting in Moose Jaw.

Les, Shannon, received word this week of the death of his mother.

"A dime's worth of sodium bicarbonate for indigestion at this time of the night" cried the infuriated druggist who had been aroused at 2 a.m., "when a glass of hot water would have done just as well."

"Well, well," returned Sandy, hastily, "I thank you for the advice, and I'll no bother ye after all. Good night."

## Church And People: God's Way With The World

(From The Enterprise, Leader)

In the material world beauty has been scattered all about us. It has been done through the agency of natural laws back of which is the Divine Mind. So perfectly has this been done that no artist, no matter how clever or how inspired, has been able to give us a true picture of the setting sun, the starry heavens or a beautiful landscape. In all this God has not in any sense been dependent on the human.

But it has been most certainly proven that moral and spiritual beauty has to flow through human channels. God is dependent on man for the good which the world contains or will contain in the future.

God might have made all His creatures without the power of choice, but there would then have been no glory crowning His head, for there is no glory in doing what one can't help doing. Glory comes as the result of choice, when a man chooses the right in preference to the wrong. Without the power of choice there would be no joy of

achievement and no pleasure of attainment, for there would be no life, life would be without any real and worthy purpose.

God has chosen rather a creature with something to do, to achieve, to attain unto, which calls for the exercise of certain important faculties, and through such exercise develop them.

To make the best kind of a world then God seeks the co-operation of these creatures with the great power of choice for the creation of a "new earth" with righteousness in it, justice in it, fairness in it and all that makes it attractive and a worthwhile place.

Each person thus makes a contribution to the weal or the woe of life, to the good or the evil, either promotes or hinders the flow of the good, becomes a channel or an obstruction.

God simply must have an instrument or an organ for revealing or transmitting His good to the world and he has conferred that honour on mankind through whom He is to build His kingdom and His spiritual world.

Moral and spiritual beauty and all that tends to make life worth while can only be built into life through the conscious co-operation of God and man.

The greatest agency in resisting the evil and promoting the good has been the Christian church. I don't see the least of all others, for one particular division of the church, and it is very difficult to find anyone that has contributed any great good to this world that has not been intensified in and been very loyal to the church.

Man's noblest occupation is to bring all his powers into subjection to his will until he attains self-mastery. —P. Boyd.

A man can do anything he believes he can do, and is determined to do, and sets himself to the task. —Haezel.

## Here and There

Mineral production in Canada for 1924 is estimated at \$203,194,000, as compared with \$214,979,331 in the preceding year, according to a preliminary statement issued by the Department of Mines. Metallic minerals accounted for \$96,034,000 of the total, followed by fuels and other non-metals with \$73,830,000, and structural materials and clay products with \$33,330,000.

The Port of Montreal created a new world record in 1924 for the amount of grain handled by any one port in any one year, namely, 165,139,396 bushels, while from January 1 to November 30 she handled 94,866,508 bushels more than her nearest competitor and 17,332,709 bushels more than the seven next busiest ports combined.

Described as the finest coastal vessel in the world, the "Princess Kathleen," recently launched by Lady Mount Stephen, widow of the late Lord Mount Stephen, a former president of the Canadian Pacific Railway, left Glasgow on January 15 on her ten thousand mile journey through the Panama canal to join the Canadian Pacific's fleet of coastal steamships plying the seaboard of British Columbia.

A historic pageant of some proportions is being planned by the Calgary exhibition board for this year, its object being to commemorate the fiftieth anniversary of the founding of the city by the old

north-west mountain trails in 1875. In the period which has since elapsed, Calgary has grown to be an extremely busy, modern city, having a population of 75,000. A stampede similar to those held in Calgary in previous years is also planned for this summer.

The itinerary of the "All Blacks," New Zealand's wonderful rugby team, hitherto unbroken, in their tour of Canada, was announced by the Canadian Pacific recently. Landing at St. John, N.B., on January 31, from the company's steamship "Montclair," the team will proceed across the Dominion via Canadian Pacific lines. They will make short stays at Montreal, on February 1; Toronto, February 2; Niagara Falls, February 3; Calgary, February 6; Banff, February 7; Vancouver, February 10-21, and sail from San Francisco on the 25th. Calgary is giving them a ball and dance at the Palliser Hotel, they will take part in the Banff winter carnival, and will play teams from Vancouver and Victoria while on the coast.

## WHERE A MISSTEP MIGHT MEAN DEATH

THE Hoodoos on the Cavell Motor Highway, Jasper National Park, curious stone figures brought into being by the erosion of the soft rock of the country, are a constant warning of the danger of the road. The hoodoos are the result of the erosion of the soft rock of the country, and are a constant warning of the danger of the road.

The roughest breath of wind would be sufficient to send them hurtling to the bottom of the valley, hundreds of feet below. A favorite sport with the tourist is to drop large stones on the hoodoos and see them sway back and forth drunkenly, or finally regain their position and remain balanced as firmly as before.

The tourist in the photograph who was bold enough to scramble down and use one of the flat stones for a table on which to rest his arms, had a strenuous climb before he again regained the level surface of the Cavell Highway, which winds up from the Athabasca Valley almost to the foot of the glacier of the Ghost, that peculiar age-old formation of ice and snow which hangs on the wide stretches of Mount Edith Cavell.

Visitors to Jasper Park Lodge may travel by motor or saddle horse from the Lodge to the foot of Mount Cavell or any of the other mountains surrounding the log cabin hostelry of the Canadian National Railway.
